

Interested in creating a dynamic website using WordPress? Not only is WordPress a powerful blogging platform, but it is also a great way to set up a Content Management System (CMS). By turning your site into a CMS, it will be much easier to maintain, update and enhance with special functionality. This intensive course will teach you how to do a custom install of WordPress, modify existing themes, develop your own custom themes and install plugins.

This course is designed for people who are already familiar with HTML and CSS. Knowledge of PHP is a plus but is not required to take this class.

## Part 1

---

- |                                |                           |
